

ST · OLAF COLLEGE

People are Noticing St. Olaf!

- *More than 2,300 prospective students have visited campus since June 1st.*
- *The National Science Foundation recently awarded St. Olaf \$600,000 for scholarships for biology majors*
- *The U.S. Department of Education awarded St. Olaf \$220,000 for a McNair Scholars program to enable students to prepare for graduate studies.*

Why is everyone so interested in our college on the Hill? It's because Oles all over the world are feeling good and [demonstrating in tangible ways](#) that they are thankful for the education they received.

- *Attendance at the 2007 Homecoming and Family Weekend was up 25%.*
- *Gifts to Partners in Annual Giving, the college's annual fund, are up by 37%.*
- *The percent of alumni participating in the Partners program is up 23%.*

We hope you feel very much the same as the 6,200 alumni who have already come together to support the Partners in Annual Giving program. Please take a moment and remember how important your time on the Hill was to you and then go to stolaf.edu/giving or call 800-733-6523 to give today. Your support gives current and future Oles the chance to have the same great experience you did.

Thank you.
